

i-Con – GUI (Programming Tool)

The building managers window in to the system enabling instant/time/temp/CO₂ setting changes for each zone. Navigation all control parameters to be set via the 4 push buttons

- Key Features
- Designed for exclusive use with **i-Con** system controller only
- 24V DC supply voltage
- Extra low voltage power supply from main controller for occupant safety
- Easy to install-single 4 wire cable
- Standard UK single switch size/fixings
- Simple 2 level pin protected menus
- Information retrieval
- Can be mounted in a safe area / convenient location e.g. cleaners room / site manager's office
- View each zone points e.g. temperature, CO₂, button position
- Modern aesthetically pleasing appearance
- All parameters of the pre-programmed control algorithms set via the 4 navigation buttons
- Designed with unique ventilation slots – increase air flow and sensing accuracy
- Made from recycled ABS material
- Dimensions 86 x 86 x 25mm

Specification

- | | |
|--|--------------------------------|
| ■ Power supply | From main controller |
| ■ OLED Graphical Screen | 5 Line display |
| ■ Simple Menu Structure | Up/down, enter, scroll through |
| ■ Temperature / CO ₂ adjustment | For each zone |
| ■ Pin Access for security | 2 level user or engineer |
| ■ Remote mounting | Located in a safe area |

Removing and Fitting Front Face

i-Con GUI Connection Diagram

- Designed for exclusive use with *i-Con* system controller only
- 24V DC supply voltage
- Easy to install-single 4 wire cable, individually shielded pairs - Beldon 8723
- Connect from the GUI Terminals E5, E6, E8 & E9 to the Main Controller terminal block E terminals E5, E6, E8 & E9.
- Ensure the GUI is fitted to the back plate correctly once the wiring is complete

Note:- Only one *i-Con* GUI can be connected to the main controller using a four core cable as above.

The i-GUI can only be used with the *i-Con* control system
